The Computer Museum

Founded in 1979 to chronicle the history and preserve the artifacts of the computer revolution, The Computer Museum is the only international institution devoted solely to computers and their impact on society. Located on the Boston waterfront, the Museum is a unique educational center dedicated to increasing public understanding and knowledge of information technology. The Museum currently hosts over 150,000 visitors annually. Millions more across the country see its various traveling exhibits.

The Museum has the most comprehensive collection of historical computers and robots in the world and more than 75 hands-on interactive exhibits. A recent exhibit addition is "The Walk-Through Computer™," the world's only two-story working model of a computer, designed to engage and teach people of all ages.

Corporate Support

Early corporate involvement provided the basis for founding the Museum. Today, in an age in which computer literacy is critical to competitive advantage, Corporate Membership allows companies to directly assist the Museum in educating our current and future labor pool. Corporate support is crucial for maintaining our educational programs.

Additional corporate sponsorship of special activities and projects has resulted in some of the Museum's most exciting exhibits and events, like "The Walk-Through Computer™" and its popular annual fundraising event, "The Computer Bowl®."

As a benefit to its corporate members, the Museum provides educational and entertainment opportunities especially suited to corporate needs. The Museum provides a forum for industry communication, admission benefits to customers, employees, and families of corporate members, and a site to host conferences, meetings, and parties. More than half of the Museum's members are headquartered outside the Boston area, a testimony to the global appeal of the institution.

Corporate Benefactor: $10,000

- 1,000 free admission passes or the privilege of a single free day with special programs for all employees and their families
- Seven designated representatives who receive all Museum publications and invitations
- Use of Museum document and video collection

AT&T Bell Labs

Esther Dyson, Editor & Publisher
(Release 1.0)

Edward Teller, Sr. Research Fellow
Hoover Institution

Patrick McGovern, Chairman
International Data Group

Ed Feigenbaum
Stanford University

Ted Nelson
Autodesk Inc.

The Computer Museum "....has become a focal point and unifying force in the highly competitive, rapidly changing [computer] industry."
— *Boston Globe*, October 1988

"The Computer Museum is the only institution that has the sole purpose of preserving something of the history and artifacts and the culture of computing. And I think that it's going to become increasingly important that we have an institution that enables us to look back and understand where we came from. And that's The Computer Museum." — Mitchell Kapor, *ON Technology*

"The Breakfast Seminar Series is a forum to learn about the various forces shaping the future of technology. The Seminar Series alone is worth the cost of membership."
— Richard Murray, *Coopers & Lybrand*

"Corporate sponsors of the Museum benefit directly from a computer literate society. Exciting interactive and educational exhibits like The Walk-Through Computer, many of which travel or are replicated, intrigue and educate visitors of all ages. This mission deserves our encouragement and support." — Laura Barker Morse, *Heidrick & Struggles*
